1 Message Set Overview

Introduction

This document describes the Exceptions and Investigations Modernisation message set. It includes the new MessageDefinitions that have been developed as part of the Exceptions and Investigations modernisation (BJ #204).

1.1 List of MessageDefinitions

The following table lists all MessageDefinitions described in this book.

MessageDefinition	Definition
camt.110.001.01 InvestigationRequestV01	The InvestigationRequest message is sent between agents or parties to create a payment or account related investigation or request a status update on an open payment or account related investigation.
camt.111.001.01 InvestigationResponseV01	The InvestigationResponse message is sent between agents to provide a response or status update on an investigation.

2 **camt.110.001.01 InvestigationRequestV01**

2.1 **MessageDefinition Functionality**

Scope

The InvestigationRequest message is sent between agents or parties to create a payment or account related investigation or request a status update on an open payment or account related investigation.

Usage

The InvestigationRequest message can be used to create an investigation for these business scenarios

-

- unable to apply;
- request for information;
- request value date adjustment;
- claim non-receipt;
- request debit authorisation;
- request use of funds;
- payment initiation not confirmed;
- miscellaenous business scenarios.

The InvestigationRequest message covers one and only one transaction or entry at a time in most business scenarios. In a request for information an agent or party may refer to more than one transaction within the Narrative element. For all other scenarios if an agent or party needs to create investigations that relate to several transactions or entries then several InvestigationRequest messages should be sent.

Outline

The InvestigationRequestV01 MessageDefinition is composed of 3 MessageBuildingBlocks:

A. InvestigationRequest

Details related to the investigation request.

B. InvestigationData

Provides all details of the reason for the investigation request.

C. SupplementaryData

Additional information that cannot be captured in the structured elements and/or any other specific block.
